

JOB DESCRIPTION

Job Title	Project Manager
Position Type	Full time
Reporting to	Management

About the Role

The company is looking to hire a Project Manager who will be responsible for leading and managing the execution of required evacuation infrastructure and solar park development related activities from inception to completion.

Job Description

ROLES & RESPONSIBILITIES:

1. Project Planning and Initiation:

- Develop project plans, including schedules, budgets, resource requirements, and risk management plans.
- Conduct feasibility studies and site assessments to assess project viability and identify potential challenges

2. Project Execution and Monitoring:

- Co-ordinate project activities, resources and stakeholders to ensure smooth execution according to plan.
- Monitor project progress, track milestones, and manage changes in project scope, schedule and costs.

3. Risk Management and Compliance:

- Identify project risks and develop mitigation strategies to minimize impact on project objectives.
- Ensure compliance with regulatory requirements, permits, and environmental standards.

4. Project Closure and Evaluation:

- Facilitate project closure, including final inspections, commissioning, and handover to operations and management teams.
- Conduct project evaluations and assessments to review lessons learned and identify areas for improvement.

QUALIFICATION & EDUCATION REQUIREMENTS & EXPERIENCE:

- Bachelor's degree in relevant engineering field, Project Management Professional (PMP) certification is preferred
- Minimum 5 years of work experience in project management, preferably within the renewable energy or solar industry. Experience in transmission line and evacuation infrastructure of utility-scale solar projects is highly valued.

SKILLS REQUIRED:

- Proven ability to manage multiple projects simultaneously, prioritize tasks, and meet deadlines
- Proficiency in project management software and tools (e.g., MS Project, Primavera, etc.)
- Knowledge of solar energy systems, construction practices, and industry regulations.
- Must have excellent computer skills i.e. Microsoft Office, MS Project, AutoCAD, computerized maintenance management systems;
- Strong writing and public speaking skills;
- Strategic thinker with an ability to influence wide sphere of stakeholders.
- Problem-solving mindset based on observed data, inspections, identified trends;
- Integrity & discretion in handling confidential information
